## PRES Sez

Hi all,

I hope everyone is enjoying the change from summer to fall. So far the weather has been very nice. As a reminder, this is the best time of the year to go do an antenna checkup. How is the condition of your antennas doing? How are the guy wires or support lines that hold up your antennas? Do you have lines that need to be replaced? How are your coax feed lines doing? When was the last time you dropped your dipole to inspect it? Have little critters been chewing on your support lines? The moral of the story now is the time to check everything outside or you may get a visit from Mr. Murphy's Law! Plus the weather is nice. Nothing worse than having to fix an antenna when it's cold out...I know from experience.

I was sent an email from ARRL that my license was going to expire this November. I clicked on the link to renew my license, logged in and paid the \$35.00 fee. One thing I didn't know was this is another service that being a member of ARRL that they provide notice via email when your license is coming up for renewal. To be honest I'm not sure if the FCC sends an email or you just need to know but looking through my emails, I don't have one from the FCC saying I need to renew. Nevertheless, I did renew and received from the FCC an email that stated "recent grant of your application" which I take means it was approved. They provided a link to my license and yes, I am now license until 2034! Next license renewal I will be 75 years old! Imagine if I was denied, I wouldn't be able to be President of the club! LOL

I have made progress on countries/entities that I have made contact with. Last reported I was at 284 contacts to different countries/entities. 260 are confirmed. I am now at 284 with 263 confirmed. Even more progress!! I'm 16 away to 300 contacts and only 37 away from 300 confirmed!!

## Solar News

As I write this issue of The Long Path, we are experiencing an X7.1 solar flare!

Solar maximum is still hopefully a year away. I was on 10M FT8 the other day and NA, SA, EU, Australia and the Pacific rim were all coming in at the same time, and you could work them all with 20 watts (and a beam).

With the SFI above 200, it should be real easy to work the great DXpeditions coming up in October and November.

Good DX de Chet VE3CFK

## KH9 - Wake Is.

Tom, NL7RR will again be active from Wake Island as NL7RR/KH9 during October 22 to November 5, 2024. QRV on 20m SSB when time permits.

## 5W0TE - Samoa

Pete, ZL4TE says trip planned for 7 days from 3rd October 2024 until 10th October. I hope to operate CW, FT8 and D-STAR, holiday style. In anticipation of this latest trip, I have joined POTA and WWFF. I intend to activate at least one of the parks (more if I get time).

## C21 - Nauru

The C21MM team is looking forward to its next adventure. This DXpedition to Nauru is already the most expensive and complicated expedition ever for us. Hopefully we won't encounter any more nasty surprises.

In a few days, on October 7, the first six team members will leave Germany and plan to arrive on Nauru on October 10, after an overnight stay in Brisbane, Australia. After their arrival there are still some things to organise, so limited operation (high bands only) will take place. Full operation with 5 stations 24/7 can be expected starting October 15 in the evening (local time, UTC +12). We will pay special attention to our sunrise and sunset for low band openings.

The whole team is grateful for the generous donations from early supporters. Thank you! Our QSL manager has received the LoTW certificate for C21MM. QSLs and LoTW confirmations will be sent out after our return in November.

## 9M6 - Labuan Is.

Saty, JE1JKL will again be QRV as 9M6NA from Labuan Island (OC-133) during October 23 to November 25, 2024. Participation in the CQWW SSB & CW contests (SOAB, LP). QSL via LoTW.

Release Candidate 7 brings for both WSJT-X and wsjt-x\_improved significant improvements for the new SuperFox mode. It introduces a new verification system which replaces the previous one, and works for both the SuperFox mode and for old-style Fox and Hound operation. All code for SuperFox operation is now open source.

## Fernando de Noronha

More than 47K QSOs in the log, with almost 13K different callsigns.

The electric company didn't come today, again, so we still have noise on many bands during nighttime. That's one reason why we haven't spent much time on 20m SSB+CW yet.

The local authorities asked us to file a new request for the 80m/160m antenna. The 60m Inverted-V is up and working well.
